

3) Early attestation and dialectal diversification

Chronology of the medieval corpus languages

The so-called Gothic epigram

De conuiuiis barbaris

Inter *eils* goticum *scapiamatzia iadrincan*
non audit quisquam dignos edicere uersos.
Calliope madido trepidat se iungere Baccho
ne pedibus non stet ebria Musa suis.

About the barbarian feasts

Under gothic *eils* *scapiamatzia iadrincan*
no one dares to produce worthy verses
Calliope is afraid to unite with wet Bacchus,
lest she stand on her feet as a drunk Muse.

DSg.	<i>gast</i>	<i>ej</i>	<i>i</i>	<i>gastiji</i>	<i>gastī</i>	† <i>gasta</i>	<i>gest(i)</i>
NPl.	<i>gast</i>	<i>ej</i>	<i>ez</i>	<i>gastijiz</i>	<i>gastīz</i>	<i>gastīs</i>	<i>gestir</i>

West / North / East Germanic: Isoglosses

		West	North	East
1)	$\bar{e}_1 >$	$\bar{a}$	$\bar{a}$	$\bar{e} (> \bar{i})$
2)	i -umlaut	+	+	-
3)	a-umlaut: $u > o, i > e$ / $_{-a, \bar{o}}$	+	+	-
4)	Consonant doubling before j : $K > KK$ / $_{-j}$	KK	K, gg, kk	K
5)	Sharpening (Verschärfung) of the semivowels j, w	jj, ww	ggj, ggw	ddj, ggw
6)	Nasal loss + lengthening: $\check{V}NF > \bar{V}F$	$\pm$	$\pm$	-
7)	Rhotacism $z > R (> r)$	+	+	-
8)	(in multisyllable words) final $-z\# >$	$-\emptyset$	$-R$	$-s$
9)	(in multisyllable words) final $-\bar{o}\# >$	$-u$	$-u$	$-a$
10)	Breaking (diphthongisation)	$\pm$	+	-
11)	Germ. $\bar{e}_2 / \bar{o}$	$\bar{e}, ia / \bar{o}, uo$	$\bar{e} / \bar{o}$	$\bar{e} / \bar{o}$

Characteristics of the «North-West Germanic» runic inscription (until ±200-500)

The language is very close, but is not identical to reconstructed Proto-Germanic

- 1) Few phonological and morpho-phonological innovations:
 - Lowering and opening $\bar{e}_1 > \bar{a}$
 - *a*-umlaut $u > o$
 - Monophthongisation of final / unstressed $ai > \bar{e}$
- 2) These are features that continue in both the North Germanic and West Germanic languages.
- 3) The language of the early runic inscriptions was therefore often referred to as "North-West Germanic".
- 4) Even more than other branches, North-West Germanic is a language continuum with internal differentiation

Characteristics of early East Germanic (including runic inscriptions)

The language has moved further away from Proto-Germanic than North-West Germanic

- 1) The so-called East Germanic inscriptions align with Biblical Gothic (Wulfila) in many features
- 2) Some phonological and morpho-phonological innovations:
 - inal devoicing of voiced fricatives: $-\bar{b}, -\bar{d}, -\bar{g}, -z\# > -f, -p, -\chi, -s\#$
 - Syncope in final syllables: $-iz\#, -az\# > -s\#$
- 3) Archaisms:
 - No umlauts (neither a - nor i -umlaut)
 - Retention of closed $\bar{e}_1$ (later $> \bar{i}$)

Characteristics of early West Germanic (partly including runic inscriptions)

West Germanic is clearly distinguished from Proto-Germanic, primarily morphologically.

- 1) Includes the North-West Germanic innovations, complemented with:
- 2) Loss of final *-z*#
- 3) Either complete (*-a-*) or partial (*-i-*) loss of stem vowels
- 4) Gemination of consonants before *-j-* (and partly also before liquids)
- 5) The 2nd person singular past tense of strong verbs is built on the past plural stem and has a different ending than in North and East Germanic (West Germanic *gābi* vs. *gaft*)

Characteristics of North Sea Germanic or Invaeonic

As a branch of West Germanic, North Sea Germanic also inherits the features of West Germanic

- **Loss of nasals before fricatives with compensatory lengthening:** Proto Gmc. **fimf* '5', **gans-* 'Gans', **tanþu-* 'Zahn' > ae. as. *fīf*, ae. mndd. *gōs*, ae. *tōþ*, afries. *tōth*
similarly however ON *gás* 'goose', *áss* 'god' < **gans(a)*, **ansuz*, but *fimm* '5', *tōnn* 'tooth'
- **Rounding *a* > *o* / _N:** WG **māna* 'moon' > OE. Ofr. *mōna*; **man(a)n-* 'human' > OE Ofr. *mon(na)*
- **Vowel fronting *ā* > *é*, *ē*; *a* > *æ*, *e*:** WG **slāpan* 'sleep', **daga* 'day' > OE *slēpan*, Ofr. *slēpa*, OE *dæg*, Ofr. *dei*
- **Palatalization of Gmc. *k*, *g* before *i*, *e* (*æ*):** WG **katila* 'cauldron', **kiusan* 'choose' > OE *cytel*, *cēosan*; Ofr. *tzetel*, *tziasa*; OS *ketil*, *kiosan*; **geldan* 'count' > OE *gieldan*, Ofr. *jelda*, OS (sporadic) *ieldan*
- ***r*-metathesis *rV* > *Vr*:** **hrussa-* 'horse' > OE Ofris. *hors*
- **Unified plural in verbs** (1st–3rd person plural are no longer distinguished)

ᚱ	ᚦ	ᚢ	ᚨ	ᚢ	ᚦ	ᚱ	ᚨ
h	n	i	j	ï	p	z	s
ᚹ	ᚦ	ᚱ	ᚱ	ᚦ	ᚨ	ᚱ	ᚨ
t	b	e	m	l	ŋ	d	o

Runic inscriptions in the elder futhark up to 500 (RuneS)

Långt in i medeltiden behöll dryckeshornen sitt statusvärde. Av bildstenar och texter framgår att också gudarna drack ur horn. Det finns även exempel på att horn använts som behållare för vikingatida skatter som ett slags "ymngeshorn". Med goticismen på 1800-talet och svärmeriet för forntiden blev det åter högsta mode att dricka ur horn.
